EXECUTIVE SUMMARY

LAMBERTUS HESSELINK, PhD

Professor

Electrical Engineering, Applied Physics, Aeronautics & Astronautics Depts

Born: Enschede, the Netherlands

Nationality: Dutch

Visa status: Permanent

Spilker building, room 301

Stanford University

Stanford, California 94305-4035

Phone: 415-269-7102

Bert@kaos.stanford.edu

Home: 101 Greenoaks Drive, Atherton, CA 94027

Phone: 650-853-1615

EDUCATION

Ph.D.	1977	California Institute of Technology Applied Mechanics and Physics/Applied Physics, Medical leave from Caltech, June 1974 – February 1975, severe burns over 50% of body Rehabilitation therapy, March 1975-January 1978
Eng.	1974	Twente Institute of Technology,
M.S.	1972	California Institute of Technology
B.S.	1971	Twente Institute of Technology Applied Physics
B.S.	1970	Twente Institute of Technology Mechanical Engineering

Languages: Fluent in English, Dutch, French and German

PROFESSIONAL CAREER

September 1980 - present	Assistant, Associate, and Full Professor of Electrical Engineering and, by courtesy, in the Applied Physics and Aeronautics and Astronautics Departments of Stanford University.
October 1977 - Oct. 1980	Instructor in Applied Physics, Senior Research fellow at Caltech.
March 1995 - April 1997	On leave from Stanford University, Founder, Chairman, CEO, CTO of Siros Technologies, Raised over \$50M in financing.
May 1997 - June 2001	Chairman Siros Technologies, Inc.
April 1994 - September 2000	Principal Investigator of DARPA funded \$53M Industry Consortium for the development of Digital Holographic Data Storage
October 1999 - 2007	Co-founder, Chairman, Senvid, Inc. Senvid was sold to Western Digital in 2007

PROFESSIONAL HONORS

Significant awards from scientific and professional societies include: Fulbright scholarship, Stheeman Price, Josephine de Karman Fellowship, DARPA award, NSIC award, Fellow of the OSA, Fellow SPIE, AIAA, N. California teacher of the year, Highest ranked teacher at Caltech in 1979, 1980, repeatedly listed on exceptional teaching evaluation list for EE department at Stanford, Five times best paper award from the IEEE, invited member of the Hubble Space Telescope Committee convened by NASA to fix the telescope, Member of the Air Force Scientific Advisory Board reporting directly to the Secretary of the Air Force, invited by Secretary of Air Force to attend and complete course at the Air War College, winner of Progressive Architecture Award and national competition for design of the Astronaut Memorial at Kennedy Space Center, student projects in EE347 won three

national optical design competitions, one of top 25 inventors at Stanford University, recipient of the “Best” Award for pioneering contributions to holographic data storage, Member of the Royal Dutch Academy of Arts and Sciences.

SCHOLARSHIP

Over 270 keynote and invited presentations at scientific meetings, organizer of over 80 scientific meetings, over 457 papers in scientific journals, over 15 book chapters, editor of Applied Optics, Applied Scientific Research, IEEE Transaction on Visualization, over 100 issued patents and pending patent applications worldwide, visiting Professor Tsinghua University China, Japan, Europe, over 45 PH.D graduates. Pioneered next generation optical data storage technology as follow-on to the \$20B annual revenue DVD market, now being developed by all major optical storage companies in the world, including Sony, Philips, Matsushita, Pioneer, Samsung, LG, and many others. Pioneered the first Internet controlled laboratory in 1998, which has lead to a worldwide effort on providing on-line teaching laboratories, with over 50 Universities participating in Europe and a similar number in the US. Technology developed for this application is now being commercialized by a start-up company in Silicon valley. Over 10 million users are projected to be using the technology worldwide in 2010. We pioneered the field of topological matrix and tensor visualization techniques in the middle 1990's, which has lead to a new branch in the IEEE meetings on Digital Image Processing and Graphics, with significant research efforts around the world. As a world-wide leader in three-dimensional imaging and signal processing, we developed and demonstrated the first tomographic imager of gaseous flows and made major contributions to 3-D solid-state up-conversion displays. Most recently we have improved the performance of nano-apertures by inventing a new C-shaped aperture that has over 1 million times power throughput improvement over round or square sub-wavelength apertures, leading to major advances in scanning near-field optical microscopy, optical data storage, biomedical sensing, chemical sensing, opto-electronic on-chip integration. Nano technology researchers around the world are now investigating the use of these apertures for a variety of applications.

EXPERTISE

Consulting to Industry and Government

Ultra-high density optical data storage, optical communication components and optical interconnects, optical information technology, nano-optics, digital image processing, Internet controlled instrumentation (CyberLab), member of several University committees, world renown expert witness in over 15 patent cases, testified to the Israeli Supreme Court for ½ hour, consultant to industry, NSF, member of US Air Force Scientific Advisory Board, Hubble Space Telescope Committee, Astronaut Memorial Co-designer.

Management (While on leave from Stanford)

Developed a personal open management style based on consensus building, collaboration and negotiation.

Started two successful high-tech companies, Siros Technologies and Senvid with financial backing from blue-chip rate VC, private and corporate sources. Managed all aspects of the business, including marketing, finance, technology and business development, product development, operations, human resources.

Devised business strategies and implemented the plans; successfully negotiated, managed and completed a \$53 M DARPA contract for the development of the next generation DVD technology; raised an additional \$54M in VC funding; managed startup growth from inception to over 67 employees; hired over 100 employees, including top management personnel; negotiated numerous business contracts, including major partnership contracts with multi-national Japanese companies such as TDK, Mitsubishi Chemical, and Olympus, as well as Lucent, EMC, and HP in the US.

Provided leadership to the Board of Directors, including Board members from top tier US VC firms New Enterprise Associates, Chemical Materials Enterprise Associates, Sequel Ventures, Austin Ventures, and multi-national companies including TDK, Lucent, Citicorp, Dow Chemical, HP, and EMC.

Developed patent strategies, carried out patent valuations for Siros technology, negotiated licensing agreements, and developed revenue models associated with these licensing efforts. Sold large patent portfolio to multi-national company.

Developed optical storage products, including novel read-write optical drives and media, holographic data storage devices, and volumetric optical drives. Took technology development effort to the prototype level.

Appeared in feature articles of Forbes and Red Haring magazines, and Senvid was selected by Venture One as one the 60 most promising angel funded companies in the US in 2000.

Initiated, Managed and executed sale of Senvid to Western Digital.

ACADEMIC CREDENTIALS

ACADEMIC HISTORY

Ph.D.	1977	California Institute of Technology Applied Mechanics and Physics/Applied Physics
Medical leave from Caltech	Jun '74 – Feb '75	Severe burns over 50% of body
Rehabilitation therapy	Mar '75-Jan' 78	
Eng.	1974	Twente Institute of Technology Applied Mechanics
M.S.	1972	California Institute of Technology Mechanical Engineering
B.S.	1971	Twente Institute of Technology Applied Physics
B.S.	1970	Twente Institute of Technology Mechanical Engineering

SCHOLARSHIPS AND ACADEMIC HONORS

1970	The Stheeman Prize for best academic performance, Twente Institute of Technology
1971—1974	Fulbright Scholar, recipient of IIE award and Dutch Government Fellowship award for studies abroad
1974—1975	Josephine de Karman Fellowship
1979, 1980	Triple star, *** Highest Teaching Rating at Caltech
1983	Award: Engineer of the Year 1982 AIAA Northern California chapter
1985	Award: Co-recipient of the Itek award for the paper "Holographic Reciprocity Law Failure", Appl. Opt. 23, 1984 issued by the Society of Photographic Scientists and Engineers

1985	Elected to Who's Who in Optical Science and Engineering
1986	Elected to Who's Who in California
1987	Elected to Who's Who in the West
1987	Elected to Personalities of the Americas
1987	Invited Visiting Professor at Tsinghua University, Beijing
1988	International Leaders of Achievement award
1988	Elected to Men of Achievement
1988	Elected to Who's Who of Emerging Leaders in America
1988	Elected to Five Thousand Personalities of the World
1988	Selected to be a member of the design team for the Astronaut Memorial in Orlando, Florida, after winning an international design competition
1989	Elected to American Men and Women of Science
1989	Recipient of the Progressive Architecture Award for the Astronaut Memorial
1989	Elected to International Directory of Distinguished Leadership
1989	Elected to Who's Who in the West
1990	Elected Fellow, Optical Society of America
1990	Elected invited Member of Image Processing Ad Hoc Committee to solve the Hubble Space Telescope problem
1990	Award: Recipient of the "Best Paper for the IEEE Visualization '90 Conference", Automated Topological Analysis of Fluid of Vector Sets, Helman, J.; Hesselink, L.
1991	Elected to Who's Who in Science and Engineering
1992	Award: Recipient of "Outstanding Paper for 1991 Award" for the Computer Society of the IEEE, "Automated Topological Analysis of Fluid Flows of Vector Sets, Helman, J.; Hesselink, L.
1992	Award: Recipient of the "Best Paper for the IEEE Visualization '91 Conference Award", Visualization of Second Order Tensor Fields and Matrix Data, Delmarcelle, T.; Hesselink, L.
1994-95	Elected to Who's Who Registry of Business Leaders
1994	Award: Recipient of "Best Paper Award from the IEEE Computer Graphics and Applications Society for 1993 for the the paper: "Visualizing second order tensor fields with hyperstreamlines," by Thierry Delmarcelle and Lambertus Hesselink; award presented at Vis '94 conference in Washington DC, October 1994.
1994	Award: Best conference paper for Visualization '94: "The topology of symmetric second-order tensor fields," by Thierry Delmarcelle and Lambertus Hesselink, presented in Washington DC, October 1994.
1994	Award: Director's Award for Significant Technical Achievement

(First Fully Automated Digital Holographic Data Storage System-HDSS), presented at 17th Systems and Technology Symposium San Francisco, CA, October 25, 1994, by Department of Defense - ARPA (Advanced Research Projects Agency).

- 1994 Selected by the Secretary of the Airforce to be a member of the Air War College, and completed summer course in preparation for civilian Air Force leadership role
- 1995-98 Elected Member of the Scientific Advisory Board of the United States Air Force reporting directly to the Secretary of the Airforce
- 1996 Elected to the Royal Dutch Academy of Arts and Sciences, April 1996.
- 1999 Award: National Storage Industry Leadership Award for 1999: "For exceptional vision and leadership of the NSIC HDSS and PRISM programs to establish proof of concept and develop the infrastructure for Holographic Data Storage"
- 1999 Recipient National Instruments Prize for Innovations in Education for developing the first Internet controlled laboratory
- 2000-2002 Elected to Who's Who in Executive and Professionals
- 2003-2004 Elected to America's Registry of Outstanding Professionals
- 2003-2005 Elected Fellow of SPIE, February 2004
- 2004-2005 Selected in Who'sWho in America, Who'sWho in Science and Engineering,
- 2005 Selected in Who'sWho in the West, Who'sWho in Finance and Business, Who'sWho in American Education, and Who'sWho in Executives & Professionals
- 2007 Best Award, for pioneering contributions to holographic data storage
- 2011 Top 1% of US inventors, with over 100 patents worldwide, many licensed
- 2011 Distinguished member of International Advisory Board, Yonsei University, Korea , 5 year appointment 2011-2016
- 2012 NSF selection as being in top 1% of all US inventors, with over 100 patents in US and worldwide, some of which used by millions of people each day
- 2013 Who is Who in America, Who is Who in the world, Who is Who business leaders, and related.
- 2013 NSF selection as being in top 1% of all US inventors, with over 100 patents in US and worldwide, some of which used by millions of people each day

PROFESSIONAL ACTIVITIES

- 1980-1988 Consultant to Hughes Aircraft Corporation, Microelectronics Corporation, Visulux Corporation, National Science Foundation, VSL Corporation, Physical Optics Corporation, Northrup and the Air Force
- 1984 Invited lecturer in lecture series on Digital and Optical Image Processing at the Von Karman

	Institute, Brussels, Belgium
1986	Invited lecturer in lecture series on Digital and Optical Image Processing at the Von Karman Institute, Brussels, Belgium
1981-1988	Presentation of short courses on holography and digital image processing in the Netherlands, Germany, China, Israel, England, Italy
1987	Invited Visiting Professor at Tsinghua University in Beijing, China
1987-1990	Member of advisory panel to the National Science Foundation
1988	Invited lecturer on Dynamic Optical Interconnects at the International School of Quantum Electronics, Erice, Italy
1988-1989	Member of the design team for the Astronaut Memorial in Orlando, Florida
1988-1990	Member of the Scientific Advisory Board to the Division of New and Emerging Technologies, the National Science Foundation
1994	Member of Editorial Board of the IEEE Transactions on Visualization and Computer Graphics (TVCG).
1995-98	Member of the Scientific Advisory Board of the United States Air Force reporting to the Secretary of the Airforce
1995-2000	Principal Investigator of a \$53M DARPA program on Holographic optical data storage, involving four Universities and five major industrial partners, including IBM, Kodak, GTE, Rockwell International and Texas Instruments. Directed a group of 136 scientists and engineers which resulted in a demonstration platform that still has the best performance of any data storage system today.

EMPLOYMENT RECORD

1978-1979	Member of the technical staff for Space and Communications Group, Hughes Aircraft Company.
1977-1978	Research Fellow in Fluid Mechanics, Graduate Aeronautical Laboratories, California Institute of Technology.
1978-1979	Instructor in Applied Physics in charge of APh 153 abc and Research Fellow in Fluid Mechanics at Caltech.
1979-1980	Senior Research Fellow in Fluid Mechanics and Instructor in Applied Physics at Caltech. In charge of the graduate course Modern Optics, APh 153 abc.
1981-1985	Assistant, Professor in Aeronautics and Astronautics and Electrical Engineering, and by courtesy in Applied Physics.
1983-present	Legal technology expert consultant in over 15 patent major suits, including a 30 minute presentation to and cross-examination by the Israeli Supreme Court
1985-1990	Associate Professor of Electrical Engineering and, by courtesy, in the Applied Physics and Aeronautics and Astronautics Departments of Stanford University.

1990-present	Professor (with tenure) in the Electrical Engineering and the Aeronautics and Astronautics Departments at Stanford University (joint appointment)
1995-1996	Founder, CEO, Chairman, and CTO of Siros Technologies, Inc., San Jose, California. (on sabbatical leave).
1996-2000	Chairman Siros Technologies
2000-2007	Chairman and Co-founder of Senvid, Inc.
2002-2003	Chairman and CEO Senvid Inc.
2002-2003	Member of the Board, Co-founder MultiDigit Corp.

EDITOR

Proceedings of the 26th International SPIE Conference, section on 3-D Processing and Display of Data, 1982
 Associate Editor for Journal of Applied Scientific Research, 1987-1996
 Topical Editor for Applied Optics, Optical Society of America, 1989-1994
 Topical Editor for Applied Sciences, 1989-1998
 Associate Editor for Applied Optics, January 1990-1994
 IEEE TVCG Editorial Board, Washington, DC, October 18, 1994.
 Associate Editor of IEEE Transactions on Visualization and Computer Graphics, 1995
 Guest Editor SIAM, special issue on Optical Data Storage
 Editor Materials Research Society, Symposium Proceeding Series, 2001.
 Editor Proceedings of IASTED, 2001
 Editor Proceedings IASTED, 2002
 Editor on Materials Research Society, Symposium Proceedings for 2003
 Editor Volume 803, MRS Advanced Data Storage Material and Characterization Techniques, 2004
 Editor, L. Hesselink, Proceedings of the Optical Data Storage Meeting 2010, SPIE, May 2010
 Editor, ODS 2012, Annual Meeting Tucson AR

MEMBERSHIPS IN PROFESSIONAL SOCIETIES

Sigma Xi
 APS, American Physical Society
 OSA, Fellow Optical Society of America
 SPIE, Fellow of the International Society for Optical Engineering
 AIAA, American Institute for Aeronautics and Astronautics
 Member of the Royal Dutch Academy of Arts and Sciences

MEETING ORGANIZER (PARTIAL LIST)

1. Meeting organizer and co-chairman of the Twenty-Sixth International SPIE Meeting in San Diego, section on "3-D Processing and Display of Data", San Diego, CA, August 26—27, 1982.
2. Organizer of topical meeting on "Holography", OSA, Honolulu, HI, April 1986.

3. Member of the local organizing committee of the Annual Meeting of the Optical Society of America, Santa Clara, CA, October 1988.
4. Organizer of meeting on "Visualization of Scientific Data", SPIE, January 1989.
5. Organizer of meeting on "Practical Holography", SPIE, January 1989/1990/1991/1992
6. Symposium Organizer on "Optical Interconnections for Computers", OSA Annual Meeting, Orlando, FL, October 15—20, 1989.
7. Organizer of session for "Experimental Techniques", APS 42nd Annual Meeting, Palo Alto, CA, November 19—21, 1989.
8. Chairperson for "Imaging", SPIE Conference, Los Angeles, CA, January 14—19, 1990.
9. Member of "Visualization" Panel, "Extracting Meaning from Complex Data" Conference, SPIE/SPSE
10. Symposium on Electronic Imaging, Santa Clara, CA, February 12—16, 1990.
11. Organizer for NASA Scientific Visualization Workshop, Stanford University, Stanford, CA, June 11—13, 1990.
12. Chairperson for "3-D Visualization of Scientific Data", SPIE Conference, San Diego, CA, July 9—13, 1990.
13. Member of organizing committee on "Optical Computing" in Salt Lake City, Utah, March 4-6, 1991.
14. Organizer for NASA Scientific Visualization Workshop, Stanford University, Stanford, CA June 11-13, 1990.
15. Chairperson for "3-D Visualization of Scientific Data", SPIE Conference, San Diego, CA July 9-13, 1990.
16. Member of organizing committee on "Optical Computing" in Salt Lake City, Utah, March 4-6, 1991.
17. Member of the Technical Committee of the IEEE Visualization '90, '91, '92 Annual Meetings
18. Member of the Committee on Engineering in Biology and Medicine, 1993.
19. Member of the Program Committee, Sixth Eurographics Workshop on Visualization in Scientific Computing, Porto Conte, Italy, May 1995.
20. Co-Chairperson for Photonics West '95, Practical Holography IX, San Jose, CA, February 1995.
21. Chairperson (Tutorial) CLEO/QELS '95, Baltimore, MD, May 1995.
22. Member of Organizing Committee, Symposium on Data Storage: 1996 Annual Meeting of the Optical Society of America, October 20-15, 1996, Rochester, New York.
23. Chairperson IEEE/LEOS, Lasers and Electro-Optics Society, November 1995.
24. Member of organizing program committee, IS&T SPIE, Symposium on Electronic Imaging and Technology-Photonics West '96, San Jose, CA, January 1996.
25. Program Committee Chair, OSA Topical Meet, "Holography," Boston, MA, April 1996.
26. Member of Program Committee, International Symposium on Holographic Memories '96, May 1996.
27. Member organizing committee, ICO XVII '96 Optics for Science and New Technology, Taejeon, Korea, August 1996.
28. Presiding Chair, OSA Annual Meeting, ILS, XCII Optics & Imaging Center, Rochester, NY, October 1996.
29. Member of Program Committee, IEEE Visualization '96, San Francisco, CA, October 1996.
30. Program Committee Chair, Photonics West '97, San Jose, CA, February 1997.
31. Program Committee Chair, Photonics West '98, San Jose, CA, January 1998.
32. Program Committee Chair, Photonics West '99, San Jose, CA, January 1999.
33. Program Committee Chair, Photonics West '00, San Jose, CA, January 2000.
34. International Workshop on Holographic Data Storage, Stanford Organizer, Nice, France, March 8-11, 1999.
35. Member of the Organizing Committee, IEEE '01, Symposium on Parallel and Large Data Visualization & Graphics, San Diego, CA October 2001.
36. Conference Chair, IASTED '00-'03 Technical Committee on Telecommunications, Banff, Canada, July 2002.
37. Program Organizer, SPRC Annual Meeting, "Nanophotonics," Stanford Campus, September 2002, 2003.
38. Co-organizer OSA Topical Meeting, Optical Data Storage Conference, May 2003, Vancouver, Canada.
39. Meeting Organizer, CLEO Europe EQEC 2003, Symposium on Optical Storage, Munich, Germany, June 2003.
40. Conference Chair, IASTED WOC 2003, Wireless and Optical Communications Conference, July 2003, Banff, Alberta, Canada.
41. Moderator and Panel Organizer, Stanford Nanophotonics Workshop, January 24, 2004.
42. Program Committee Member of the 2nd IASTED International Conference on Communication and Computer Networks (CCN 2004), Cambridge, MA, November 2004.
43. Program Committee Member of the IASTED International Conference on Communications, Internet and Information Technology (CIIT2004), St. Thomas, Virgin Islands, November 2004.
44. Chair OSA bi-annual meeting on photorefractives, PR'07
45. Chairman of the International ISOM/ODS 2011 OSA meeting, Hawaii, 2011
46. Founder and Sponsor of the Leen van Wijngaarden Prize Foundation, 2011
47. Chairman of the Leen van Wijngaarden Prize selection committee, 2011 till present
48. Ambassador of the Twente University, 2011 till present

49. Co-Founder of the Secure Content Storage Association, 2011
50. Distinguished member of International Advisory Board, Yonsei University, Korea , 5 year appointment 2011-2016
51. Advisor to the Dutch Government on energy issues, 2011 till present
52. 3D Editorial Board Member, 3DMR, Korea, 2011 till present
53. Member of the International Advisory Board, CC3DMR Korea, 2011 till present
54. Co-Founder and Founding Chairman of the “Secure Content Storage Association”, a LLC formed between Warner Bros, Fox, Western Digital and Sandisk to develop the next generation of content storage platform for Premium Content (Follower to BluRay technology) , 2012
55. Chairman of the ODS 2012 meeting in Tucson Arizona, 2012
56. Ambassador of Twente University, 2012
57. Consultant to industry, 2012 till present
58. Editor Journal of 3-D imaging, 2012 till present
59. Member of the OSA Awards Committee, 2012 -2015
60. NSF Proposal Review committee, Expert witness in data storage and asbestos litigation, 2012 till present
61. Founding Chairman of the Secure Content Storage Association (SCSA) consisting of Warner Bros, Fox, WDC, Sandisk, Samsung, LG, Seagate, 2013
62. Ambassador of the University of Twente, 2013
63. Board member of Yonsei University Advisory Board, Korea, 2013
64. Editor Journal of 3-D Imaging, 2013
65. Member of OSA Leith Awards committee, 2013
66. Member of the Editorial Advisory Board of Optical Data Storage and Processing, 2013
67. Expert witness in major cases involving optical data storage and asbestos litigation, 2013

SIGNIFICANT RESEARCH AND PROFESSIONAL ACCOMPLISHMENTS

A. LASER-MATTER INTERACTION:

1. Laser propagation through a random medium. 1973-1980

At Caltech, in the 1970's I designed, built and conducted a very powerful experimental apparatus for studying the propagation of nonlinear acoustic and optical waves through a random medium. This study became a benchmark research effort, and still stands as the most comprehensive experimental and theoretical study in this area. The results of this study were disseminated worldwide at scientific meetings through over 16 invited lectures.

2. Femto second and nano second laser-matter interaction 1990-2005

In the early 1990's we designed, built and tested a novel pulse laser deposition system with unique optical diagnostics and controls in place that allowed us to study the interaction between nano-second and femto-second pulses and a variety of materials. We studied ablation of photorefractive media, and more recently silicon. We developed a new theoretical framework for understanding laser material removal at the femto and nano second time regimes. This work has gained significant interest in both the scientific community and industry as laser ablation in silicon is now used to machine intricate patterns in integrated circuit boards, and inkjet nozzles among other applications.

B. THREE-DIMENSIONAL IMAGING, ANALYSIS, STORAGE AND DISPLAYS

1. Three-dimensional flow visualization. 1981-2000

We developed the first numerical and experimental holographic analysis tools for understanding complex fluid flows and chemical reactions. We were the first to build a holographic display of a mixing jet and used these new tomographic imaging diagnostics techniques to investigate fluid flow behavior that lead to much improved understanding of fluid flows computed by numerical techniques.

2. Three-dimensional medical displays 1981- 1998

In the early 1980's we developed new holographic display techniques for visualization of medical data, such as NMR and CAT scans in conjunction with the medical school at Stanford University and Professors Goodman and Macovski. This work ultimately led to the first all-solid state three-dimensional display that uses up conversion rare-earth doped glasses. Currently this work still stands as the premier effort in solid state volumetric displays. We developed extensive new materials and system concepts in conjunction to address the complete system.

3. Topological visualization of vector and tensor data sets 1985-2008

In 1985 we published the first paper on using mathematical topology to analyze and display complex vector and tensor data sets. This work has pioneered a new area in research in the visualization community and graphics community worldwide. The IEEE now has an annual meeting in which vector and tensor field topology takes on a prominent role. Our pioneering first papers, which have won several awards from the IEEE are still the benchmarks by which all current topological papers are compared.

4. Holographic and optical data storage 1985-2008

In 1985 we started pioneering work on holographic data storage to develop the next generation optical data storage technology, which is now a \$20B industry. We have lead the word in fundamental material science and optical systems technology that has lead to the worlds highest performance storage system in 2000, when we demonstrated over 16 Gbit/sec data transfer rate and storage capacities of 100's of GB on a CD disk. Worldwide all major storage companies are now working on holographic data storage systems as the next generation optical storage technology. Our group is recognized around the world as the pioneering leader in this area. We have presented our work in over 100 invited papers and keynote talks at all major optical and magnetic storage meetings worldwide. The \$53 M DARPA HDSS and PRISM programs, founded and lead by me are still considered the best research effort in this area, worldwide and have formed the basis for smaller follow-on efforts around the world by every major optical storage system manufacturer, including Sony, Philips, Matsushita, Pioneer, Samsung, LG, and many others.

C. FUNDAMENTAL MATERIALS SCIENCE FOR USE IN OPTICAL SYSTEMS

1. Photorefractive physics and material science for optical interconnects and storage 1981-2004

In the early 1980's Professor Goodman and myself developed the first optical interconnects based on holographic and photorefractive materials for dynamic operation. This work lead to a worldwide effort in using optics for optical interconnects in electronic circuits, and has resulted in applications ranging from back-planes in computers to local area networks using holographic switches and connectors. We started and lead the way to using photorefractive materials for dynamic interconnects, by developing new and improved materials as well as new architectures for optical interconnects in free spaced, on planes and in volumes. In the middle 1980's we expanded this work to include holographic data storage using photorefractive and photopolymer media. We developed new fiber based photorefractive media for displays and storage, and we have grown extensive new crystals using dopants optimized for new functionality. For example, we developed LiNbO₃ media doped with rare-earth elements to achieve the first optically gated long-term storage in LiNbO₃ with an efficiency similar to that of LiNbO₃ doped with Fe. This lead to new long term storage capabilities of photorefractive media, and this work has been the leading example for new follow-on efforts worldwide. This work lead to my inclusion in the list of 40 top Dutch material Scientists of the last century.

2. Glass and polymer media for storage and display 1981-2004

Our research has been characterized by using an approach of addressing total system issues, including both materials and components needed to develop new systems having revolutionary new performance. To this end we have built a unique pulsed laser deposition system combined with MBE capabilities for making glass waveguides and thin film structures. We also built extensive crystal growth facilities for growing all types of photorefractive crystals and fibers. These facilities allowed us to grow many crystals with much improved performance for optical processing and data storage, including LiNbO₃ doped with different dopants for long term storage, fast processing and electrically gated diffraction. These media lead to new developments in optical communications and processing. We also developed new glass media by doping glass hosts with numerous rare earth dopants for the first three-dimensional all solid state display.

To augment the materials efforts we carried out extensive modeling of materials growth processing as well as the physical performance and response of these media to laser irradiation of femto, pico, nano and msec pulses.

D. NANO APERTURES AND SENSORS USING SURFACE PLASMON RESONANCES

1. Ten million times improved performance C-shaped nano apertures 2000-2008

In the late 1990's we discovered a new shaped nano aperture that has remarkable performance compared with conventional round and square sub-wavelength apertures, solving a long standing severe problem with nano-imaging. By morphing a rectangular aperture into that of a letter C-shape, the optical power throughput increases by a factor of over one million at the same near field optical spot size. These apertures allow NSOM systems to be much improved in terms of scanning speed and performance, and makes it feasible to store over 1 TB of data on an optical disk. C-shaped apertures are now investigated world wide for application in optically assisted magnetic recording, bio sensing, optical storage and NSOM applications, among others. The core of our work is to emphasize the fundamental optical and physical processes involved in the generation of these nano-sized spots, and using this understanding to develop new systems and physical applications. This work has lead to over 25 invited talks and key note addresses worldwide, and a number of patents, with researchers worldwide following up on our research.

2. 1000x times improved Goos-Hanchen surface plasmon resonance bio sensors 2002-2008

Surface plasmon resonance (SPR) sensors are widely used in bio engineering and science research for detecting species interactions and properties. These sensors rely on reflectivity properties of an optical beam near incident at near the total internal reflection angle. We discovered that by using the Goos-Hanchen effect we could improve the sensitivity of these sensors by two to three orders of magnitude. This increase in sensitivity now allows measurement of single molecule interactions that have the potential to open up whole new areas of biological research. We are working with Professor M. Davis in the School of Medicine to explore the use of ghSPR sensors for research on protein-protein interactions for immune system response. GE, having bought Biocor, among many others is now starting a new program on ghSPR sensing in conjunction with our lab.

3. Finite Difference Time Domain calculations of nano structures

We have developed and extensively tested a robust modeling program for calculating nano-sized optical structures. This program has allowed us to design, test and build novel optical apertures and structures having orders of magnitude performance improvements over previous apertures. This program is also combined with our previous work on topology to provide us with unique and very significant tool for obtaining insight into the physics of how nano structures work. This has lead to the innovations described above.

E. INTERNET ASSISTED LABORATORIES, ILABS 1995-2005

In 1998 we pioneered the first internet assisted laboratory, Cyberlab. We demonstrated for the first time that the internet could be used to remotely access and control an optics experiment. We built a complete stand-alone system by adopting existing internet technologies and by inventing a new architectural approach that makes it possible to

allow multiple users to seamlessly interact and carry out remote experiments as if they were physically present in the same laboratory. We invented new electronic notebooks, and control mechanisms that were needed for reliable control of instruments over a best-effort internet communication system. This work has received several prizes and we have presented key note lectures and over 50 invited talks worldwide on this topic since then. Our work has stimulated worldwide interest in iLabs and in Europe and the US several consortia have been formed involving over 50 universities to further develop this technology and test its pedagogical value for education and training. New internet technology developed during this project has formed the foundation of a startup company that is leading the way in novel remote access and sharing applications for individuals and small businesses.

F. LEGAL EXPERTISE 1983-2008

Over the years I have gained a reputation as a worldwide recognized expert on optics and holography. I have been an expert witness in over 15 major case and I have never lost a case. This includes expert witness services to multi-national corporations including Sony, Philips, Hughes Aircraft, and Dolby, as well as smaller firms. I was presented with an unusual invitation to argue the case from a technical perspective for the Israeli Supreme Court for 30 minutes. I was a key member of several teams which were awarded multi-million dollar damages awards.

I have also extensive experience in contract law. I have defined and negotiated multi-million dollar research agreements with major companies including TDK, Olympus, Mitsubishi Chemical, IBM, Kodak, Rockwell International. I single handedly negotiated and completed the Intellectual Property rights agreement and the research contract among twelve research partners in two \$53M DARPA programs.

As an inventor of over 60 patents and 34 more pending applications, I have gained significant patent law experience, in both prosecution, litigation and licensing. I have managed several large patent portfolios and I have successfully licensed patents to major corporations.

G. MANAGEMENT EXPERIENCE AND FUND RAISING

As founding Principal Investigator of two large \$53M DARPA programs, I managed and lead a research team over 130 scientists and engineers. As PI I was responsible for all financial and technical reporting, as well as all interfaces with the Government. This program was very successful and stimulated companies and universities worldwide to continue research on holographic data storage, leading to the first commercial holographic data storage system prototype in 2005. Holographic data storage is now considered one of the prime candidates as follow-on technology for DVD storage. The impact of our work on the \$20B optical storage industry has been profound and recognized around the world.

H. START-UP COMPANIES FOUNDED (WHILE ON LEAVE FROM STANFORD)

Started two high-tech companies with backing from blue chip VC, private and corporate sources. Developed and assisted in all aspects of the business, including marketing, finance, technology development, product development, operations, HR and business development. Raised over \$50M in VC funding, grew Siros to over 67 people, and hired over 100 employees, including top management personnel. Negotiated numerous business contracts, including major partnership contracts with Japanese industries such as TDK, Mitsubishi Chemical, and Olympus, as well as Lucent, EMC, and HP in the US.

Developed new technology in the data storage area, from the inception to complete prototype development, testing and preliminary manufacturing, as CTO at Siros.

Developed patent strategies, carried out patent valuations of Siros technology, negotiated licensing agreements, and developed revenue models associated with these licensing efforts, after Siros was sold.

Appeared in feature articles of Forbes and Red Haring magazines, and Siros was selected as one the ten top companies to watch.

Senvid is a spin-off company based on the iLabs technology and provides Personal Private Networks to individuals and small and medium businesses. Senvid's unique patented peer-to-peer secure technology will be widely used around the world by over 10 million users in 2008. Senvid was bought by Western Digital in 2007.

I.SIGNIFICANT GOVERNMENT CONSULTING

I have been a member of several NSF advisory Boards, advising the government on research policies as well as issues related to gender in science and engineering.

I was invited by Dr Sheila Widnall to become her personal invitee to the **Air War College**, as a prerequisite for membership in the **Air Force Scientific Advisory Board**. I reported directly to the Secretary of the Airforce on issues related to technology and systems for future warfare.

When the **Hubble space telescope** failed shortly after launch, I was invited by NASA together with a handful of other top scientists and engineers in the country to form a committee to investigate the cause of the failure, and to recommend solutions to the problem. Our committee ultimately diagnosed the problem correctly and proposed a corrective solution. This correction was successfully implemented making the Hubble space telescope perform beyond the original specifications.

Together with the architect firm of Wes Jones we won a nation-wide competition to design the **Astronaut Memorial** to honor the astronauts fallen in the US space program. We designed, built and delivered on time the Astronaut Memorial at the Kennedy Space Center, which was inaugurated by Vice President Quale of the first George Bush administration in 1991.

J. NOVEL DIFFERENTIAL PHASE CONTRAST 3-D X-RAY IMAGING

2012-present

We are developing a novel method for aviation security with applications in medicine, biology, and industrial inspection among others. Differential phase contrast (DPC) imaging holds promise for measuring the index of refraction of liquids using partially coherent X-ray sources. This technique has been developed for medical applications, but has very limited field of view (FoV), is not very efficient in the use of X-ray photons with losses over 75% due to the use of gratings required for DPC. We have developed a new X-ray source producing partially coherent X-rays up to 220KeV, and a mating detector that allows us to increase the FoV by an order of magnitude, increase X-ray throughput by over 4x and reduce the time and complexity for making DPC measurements. The heart of the newly developed technology is a photo-electron source that allows the generation of partially coherent X-rays from ~500fsec to CW.

We are investigating the underlying fundamental physical phenomena, the application of novel modeling techniques and we are pioneering a novel way in which DPC measurements can be obtained. At the same time we are working with industrial partners to transfer the technology developed in our laboratory into the market place.

K. NANO OPTICAL CONVEYOR BELT

2011-present

We have developed a novel way in which nano particles can be trapped using C-apertures invented in our laboratory in 2000. We invented, and then built and tested a Nano Optical Conveyor Belt (NOCB) that is capable of trapping and then transporting nano sized particles in a 2-D plane. This fundamental technology allows us to build novel

devices for sorting, for example DNA, proteins, nano particles for bio applications, for creating 3-D nano materials, and for stimulation of neuron activity in living organisms, among other applications. This is to our knowledge the first time that nano particles have been trapped and then transported in a controlled manner. The NOCB platform technology has the potential to become a cornerstone of the lab on a chip.

115. Baetjer Seminar, invited Baetjer lecturer, "The Encyclopedia Britannica inside the head of a pin," Princeton University, New Jersey, April 1997.
116. Baetjer Seminar, invited Baetjer lecturer, "Tensor datasets: how do we analyze and visualize them," Princeton University, New Jersey, April 1997.
117. University of Oregon Colloquium, invited paper, "Review of holographic data storage," Eugene, OR, April 1997.
118. Lasers and Electro-Optics/Quantum Electronics & Laser Science Conference (CLEO/QELS '97), short course, "Holographic Storage," Baltimore, MD, May 1997.

119. Sony Corporation, invited talk, "The Encyclopedia Britannica inside the head of a pin," Tokyo, Japan, June 6, 1997.
120. Hitachi CRL, invited talk, "Holographic digital data storage system, Tokyo, Japan, June 6, 1997.
121. Waseda International Symposium & 6th Topical Meeting of Photorefractive Materials, invited talk, "The Encyclopedia Britannica inside the head of a pin?", Tokyo and Chiba, Japan, June 1997.
122. Waseda International Symposium on Phase Conjugation & Wave Mixing (Waseda Symposium), invited talk, "Recent Advances in Digital Holographic Data Storage," Waseda University, Tokyo, Japan, June 8-10, 1997.
123. Waseda International Symposium on Phase Conjugation & Wave Mixing (Waseda Symposium), invited talk, "Radial inhomogeneities in a-axis grown strontium barium niobate fibers prepared by laser heated pedestal growth technique in different conditions," Waseda University, Tokyo, Japan, June 8-10, 1997.
124. 1997 Topical Meeting on Photorefractive Materials, Effects and Devices (PR '97), invited talk, "Phase-instabilities, scattering centers in oxide crystals addressed to high density holographic data storage systems," Nihon Aerobics Center, Chiba, Japan, June 11-13, 1997.
125. AIAA Computational Fluid Dynamics Conference, Scientific Visualization, invited paper, "Visualization of 3-D Tensor Fields," Snowmass, CO, June 1997.
126. 1997 Topical Meeting on Photorefractive Materials, Effects and Devices (PR '97), invited paper, "Phase-instabilities, scattering centers in oxide crystals addressed to high density holographic data storage systems," Nihon Aerobics Center, Chiba, Japan, June 11-13, 1997.
127. Lasers & Electro-Optics/International Quantum Electronics Conference, Short Course #108, "Holographic Data Storage", San Francisco, CA May 5-7, 1998.
128. Presentation at 25th International Conference on Computer Graphics and Interactive Technique Conference, July 19-25, 1998, Orlando, Florida, "Vector Field Comparisons Using Earth Mover's Distance," by Yingmei, Rajesh Batra, and Lambertus Hesselink.
129. Presentation at International Symposium on Optical Science, Engineering and Instrumentation, SPIE's 43rd Annual Meeting, July 19-24, 1998, "Precompensated two-color digital holographic storage," by Eric Bjornson and Lambertus Hesselink.
130. Presentation at SPIE conference, San Diego, California, July 22-24, 1998, "Properties of compositional volume grating formation in photoactive species induced polymerization processes" by Loukas Paraschis, Lambertus Hesselink and Annapoorna Akella.
131. Presentation at SPIE conference, San Diego, California, July 22-24, 1998, "Statistical analysis of photopolymer volume grating fluctuations in a holographic digital data storage system" by Loukas Paraschis and Lambertus Hesselink.
132. Presentation at Nonlinear Optics '98 Materials, Fundamentals and Applications Topical Meeting, August 9-14, 1998, Princeville, Kauai, Hawaii, "Statistical Analysis of Polymer Grating Distortions in Volume Holographic Digital Storage," by L. Paraschis and L. Hesselink.
133. Presentation at Nonlinear Optics '98 Materials, Fundamentals and Applications Topical Meeting, August 9-14, 1998, Princeville, Kauai, Hawaii, "Properties of Compositional Volume Grating Recording in Photopolymers," by L. Paraschis and L. Hesselink.
134. Presentation at Nonlinear Optics '98 Materials, Fundamentals and Applications Topical Meeting, Kauai, Hawaii, August 10-14, 1998, Cat. No., 98CH36244, p. 251-3 (conference paper), "Fundamental issues related to digital holographic data storage," by Lambertus Hesselink and Loukas Paraschis.

135. Invited talk at Nonlinear Optics '98, Materials, Fundamentals and Applications Topical Meeting, August 9-14, 1998, Princeville, Kauai, Hawaii, "Fundamental Issues Related to Digital Holograph Data Storage," by Lambertus Hesselink.
136. Presentation at Photonics China '98 Conference, Beijing, China, September 16-17, 1998, invited paper, "Fundamental issues related to digital holographic data issues," by Lambertus Hesselink.
137. Presentation at International Symposium on Optical Memory '98, Tsukuba, Japan, October 20-22, 1998, invited talk, "Non-Volatile Digital Holographic Memories," by Lambertus Hesselink.
138. Invited Lecture at Silver Jubilee Symposium of the Optical Society of India, Optics and Opto-Electronics Conference, Irde Dehradum, India, "High performance digital holographic optical memories," by Lambertus Hesselink, December 9-12, 1998.
139. Presentation at the International Photonics Conference, Symposium on Photorefractive Holography and Applications, Taipei, Taiwan, December 16-18, 1998, invited talk, "A compact digital holographic storage system: design and performance," by Lambertus Hesselink.
140. Invited Lecture at Silver Jubilee Symposium of the Optical Society of India, Optics and Opto-Electronics Conference, Irde Dehradum, India, "High performance digital holographic optical memories," by Lambertus Hesselink, December 9-12, 1998.
141. International Workshop on Holographic Data Storage, Stanford Organizer, Nice, France, March 8-11, 1999.
142. Presentation at the SCCE II International Workshop "Scientific Computing in Chemical Engineering II," invited presentation, "Topology Based Comparison Technique for Vector Fields Using Earth Mover's Distance," by Lambertus Hesselink, Hamburg, Germany, May 2-28, 1999.
143. Presentation at the Distinguished Lecturer's Series, Livermore, CA June 1999, invited talk "Holographic Data Storage," by Lambertus Hesselink
144. Presentation at the Xerox PARC Forum, June 10, 1999, Palo Alto, invited talk "Volumetric High Density Data Storage," by Lambertus Hesselink
145. Presentation at the NSIC Annual Meeting, June 22, 1999, Monterey, CA , Three Dimensional Storage: "1 Gbit Holographic Data Storage System Demonstrator."
146. Presentation at the ISOM/ODS '99 Conference, "Physical Properties of volume holographic recording utilizing, photoinitiated polymerization for nonvolatile digital data storage," Paraschis, Loukas; Sugiyama, Yasuyuki; and Hesselink, Lambertus, July 11-15, 1999, Koloa, Hawaii.
147. Presentation at the SPIE, IDEMA/NIST "Recent Advances in Metrology, Characterization and Standards For Optical Digital Data Disks" Conference, Denver, CO, July 18-13, 1999, invited paper "High density Optical Data Storage," by Lambertus Hesselink.
148. Presentation at the ETOP '99, 6th International Meeting on Education and Training in Optics and Photonics Workshop, invited, "Cyberlab," Cancun, Mexico, July 28-31, 1999.
149. Presentation at the ICO VIII, 18th congress of the International Committee for Optics, "Physical properties of photopolymer recording for on-volatile volume holographic storage," Paraschis, L., Sugiyama, Y., and Hesselink, L., San Francisco, CA August 2-6, 1999.
150. Presentation at the IDEMA/DISKCON Conference, invited paper "Fundamental Aspects of Digital Holographic Data Storage, San Jose, CA," San Jose, CA September 21, 1999.
151. Short Course, invited OSA Annual Meet, "Holographic Storage," Santa Clara, CA, September 26, 1999.

152. Presentation at the Photonik Symposium/Volkswagen-Stiftung, invited paper, "High speed digital holographic data storage Demonstrator," Duisburg, Germany, October 1, 1999.
153. Presentation at the Leos '99 Annual Meeting, invited paper, "Optical Data Storage Systems," San Francisco, CA, November 9, 1999.
154. Short Course, OSA Annual Meet, invited, "Holographic Storage," September 26, Santa Clara, CA.
155. Presentation Gerhard-Mercator-Universitat-GH-Duisburg Volkswagen-Stiftung, Photonik Symposium/Volkswagen-Stiftung, invited paper, "High Speed Digital Holographic Data Storage Demonstration," Duisburg, Germany, October 1, 1999.
156. Presentation at the LEOS '99 Annual Meeting, invited paper, "Optical Data Storage Systems", November 9, 1999, San Francisco, CA.
157. National Instruments Week, Education Day, "Cyberlab, A New Paradigm in Distance Learning," Bjornson, Eric; Rizal, Dharmarus, Hesselink, Lambertus, August 19, 1999, Austin, TX.
158. WMC 2000, Society for Computer Simulation International. Invited, "Cyberlab: A New Paradigm in Distant Learning," San Diego, CA January 26, 2000.
159. NSF Workshop: Learning from the Net: The Leading Edge in Internet-Based, invited talk, "Cyberlab: A New Paradigm in Distant Learning," Stanford University, Stanford, CA, February 11, 2000.
160. APS March Meeting 2000, invited talk "From the Classroom to the Boardroom," Minneapolis, MN, April 19-21, 2000.
161. CLEO QELS 2000 Conference on Lasers and Electro-Optics, Invited Short Course, "Holographic Data Storage," San Francisco, Moscone Center, May 8, 2000.
162. Optical Data Storage Conference IEEE/OSA/SPIE, invited paper/talk, "3DR Technology," Vancouver, BC, Canada, May 14-18, 2000.
163. Optical Internet, The Next Generation, invited talk, "High Density Data Storage Technologies," Stanford Campus, Stanford, CA, May 16, 2000.
164. SSGRR-2000, invited presentation, "Cyberlab: A New Paradigm for Internet Learning," L, Hesselink, E. Bjornson and D. Rizal, L'Aquila, Italy, July 31-August 6, 2000.
165. University of Latvia, ECAPD-5 Conference, invited Plenary/presentation, "Ultra High density Data Storage" by L. Hesselink, Jurmala, Latvia, August 27-30, 2000.
166. OSA Annual Meeting & Exhibit 2000, "Video Demonstration of high data rate holographic disk data storage system," William Phillips, Sergei Orlov, Eric Bjornson, Padma Sundaram, Lambertus Hesselink, Stanford University; Robert Okas, Siros Technologies, Inc., Providence, RI, October 2000.
167. OSA Annual Meeting & Exhibit 2000, "10 gigabit/second sustained optical data transfer rate from a holographic disk digital data storage system," Sergei Orlov, William Phillips, Eric Bjornson, Lambertus Hesselink, Stanford University; and Robert Okas, Siros Technologies, Inc., Providence, RI, October 2000.
168. MORIS/APDSC 2000, invited talk, "Ultra high density data storage, Nagoya, Japan, October 30 to November 2, 2000.
169. Ultra-High-Density Data Storage, Hesselink, L., Communications of the ACM: November 2000, v. 43, no. 11, p. 33-36, Stanford University, Palo Alto, CA.
170. IPC 2000. International Photonics Conference, invited talk, "Ultra-high capacity and performance optical

171. Data storage systems” L. Hesselink, S. Orlov and W. Phillips, Taiwan, December 12-15, 2000.
172. CLEO 2000 Conference, “High Transfer rate (1 Gbit/sec) high-capacity holographic disk digital storage system,” by S. S. Orlov, E. Bjornson, W. Phillips, Y. Takashima, X. Li, and L. Hesselink, Stanford University, San Francisco, California, May 7-12, 2000.
173. SSGRR-2000 Conference, “Cyberlab: A New Paradigm for Internet Learning,” by Lambertus Hesselink, E. Bjornson and Dharmarus Rizal, L’Aquila, Italy, July 31-August 6, 2000.
174. SPIE/Photonics West, SPIE Conference on Visual Data Exploration & Analysis, invited paper, “Visualization and vector and tensor fields and quantitative comparisons,” D. A. Waldman, E. A. Cetin, R. T. Ingwall, R. A. Minns, Aprilis, Inc.; S. Orlov, W. Phillips, L. Hesselink, Stanford University, January 23, 2001, San Jose, CA
175. SPIE/Photonics West, SPIE Conference on Visual Data Exploration & Analysis, invited paper, “High-performance data storage in a rotating disk of Aprilis CROP recording medium,” D. A. Waldman, E. A. Cetin, R. T. Ingwall, R. A. Minns, Aprilis, Inc.; S. Orlov, W. Phillips, L. Hesselink, Stanford University, January 23, 2001, San Jose, CA
176. European Media Laboratory, invited paper “Internet Assisted Laboratories,” Heidelberg, Germany, January 2001.
177. CRISM Review, Future Technologies: Investigating New Optical Storage Technology AuthentiCorp and Advanced Applications – ReplTech, invited talk, “10 Gbit/sec Holographic Data Storage Demonstration,” February 20, 2001, Los Angeles, CA.
178. ODS 2001, Optical Data Storage Conference, invited talk, Nano-aperture with ultra-high power throughput for VSAL,” Xiaolei Shi, Lambertus Hesselink, Stanford University, Robert L. Thornton, Siros Technologies, Inc., April 24, 2001, Santa Fe, New Mexico .
179. University of San Francisco, invited talk “Optical Data Storage,” San Francisco, CA, April 16, 2001.
180. OSA 2001, "Nano-aperture with Power Throughput or Near Field Optical Applications", Xiaolei Shi, Robert L. Thornton, Lambertus Hesselink, October 14-18, 2001, Long Beach, CA
181. ISOM 2001, "Mechanisms for Enhancing Power Throughput from Nano-apertures for Near Field Optical Data Storage", Xiaolei Shi and Lambertus Hesselink, October 10-16, 2001, Taipei, Taiwan.
182. Associative recall in a volume holographic storage system based on phase-code multiplexing, Berger, G; Denz, C; Orlov, SS; Phillips, B, Hesselink, L.; Applied Physics B: Lasers and Optics, December 2001; v. 73, no. 8, p. 839-845.
183. Distance Education Colloquy, invited talk, “ Remotely Controlled Laboratories,” San Diego, CA January 6-8, 2002
184. SPRC Annual Meeting, Joseph Matteo, Xiaolei Shi, Yin Yuen, Lambertus Hesselink, “Optical nano-tweezer using sub-wavelength “C”-aperture”, Stanford Photonics Research Center annual meeting , Stanford University, Palo Alto, CA, September 16-18, 2002.
185. ICOLA’02 Conference, Lambertus Hesselink, Xiaolei Shi, “Ultra-high Power Transmission Through a Single Nano-Aperture”, International Conference on Opto-electronics and Laser Applications (ICOLA), Jakarta, Indonesia, October 2-3, 2002 (Invited).
186. SSGRR 2002W International Conference on Advances in Infrastructure for e-Business, e-Education, e-Science and e-Medicine on the Internet, invited plenary talk: “The Next Wave of Internet Applications: Seamless Integration of Devices, Users and Data,” L. Hesselink, January 22-27, 2002, L’Agila, Italy.

187. USAF: Workshop "World Wide Web," Project Kaleidoscope, invited talk, "Web-assisted Inter-institutional Collaborations for Teaching and Research, Colorado Springs, CO, February 8-10, 2002.
188. IDEMA 2002, DISKCON, International Exhibition for Disk Drive and Media Technology, invited paper, "Recent Advances in Holographic Data Storage: Pre-cursor for Commercialization," Lambertus Hesselink and Sergei Orlov, and invited talk: "Holographic Storage Not a Dream Anymore," L. Hesselink, April 11-12, 2002, Tokyo, Japan.
189. Hesselink, L., and Orlov, S., "Recent Advances in Holographic Data Storage: Pre-Cursor for Commercialization," proceedings ISOM 2002.

- 309.Keynote, L. Hesselink, "Secure Content Storage Association", ODS 2012, Tucson AR
- 310.Invited, L. Hesselink, Y. Takashima, "Wearable Head-up Display", CC3DMR, Seoul, Korea, June 2012
- 311.Invited, Juan R. Maldonado and Piero Pianetta, Yao-Te Cheng, Lambertus Hesselink, and R. Fabian Pease, Yuzuru Takashima, Chuong Huynh and Larry Scipioni, ""CsBr based photoelectron nano sources", Cold Beams Conference, Nimes, France, 2012
- 312.Invited, L. Hesselink, "Differential Phase Contrast Imaging for DHS applications", Non destructive testing Symposium, Maryland, 2012
- 313.Invited, L. Hesselink, "DPC imaging and Photo Electron Arrays for 3-D X-ray imaging", Industry day Symposium, Department of Homeland Security, Washington, DC, 2012
- 314.Invited, L. Hesselink, CES storage Symposium, Secure Content Storage Association, Las Vegas, 2012
- 315.Invited, L. Hesselink, Ambassadeurs meeting, "Renewable energy systems", 2012, Amsterdam
- 316.Invited, L. Hesselink, Faculty College, "Energy sequence for EE students", May 2012
- 317.Invited, L. Hesselink, Comcast broadcasting meeting, "Secure Content Storage Association", Denver, CO
- 318.Invited, L. Hesselink, "Nano photonics with application to optical data storage and imaging", Symposium Boulder CO
- 319.Invited, L. Hesselink, "Innovation at Universities", Dutch Symposium on Innovation, November 2012, The Hague
- 320.Invited, L. Hesselink, "Nano Photonics and Applications", 3-D Imaging Symposium, Yonsei, Korea, 2012
- 321.Invited, L. Hesselink, "Phase contrast tomography and X-ray source for homeland security applications, Industry day, Washington DC, September 18, 19 2012
- 322.Invited L. Hesselink, AP 2, "Nano Optics for application in data storage and imaging", Stanford University, October 2012
- 323.Invited L. Hesselink, "Optical data storage with nano technology", Yonsei University, Korea, October 2012
- 324.Invited, L. Hesselink, "Fundamental Principles of Nano Photonics", University of Colorado, May 2012
325. Invited, L. Hesselink, Y. Takashima, "Wearable Head-up Display", CC3DMR, Seoul, Korea, June 2013
326. Invited, L. Hesselink, "Nano Optical Photo Electron Source", CC3DMR, Jeju Island, Korea, June 2013
327. Invited, L. Hesselink, "Differential Phase Contrast 3-D imaging", ISPD, Beijing, June 2013

328. Invited, L. Hesselink, "Differential Phase Contrast 3-D Imaging system and Applications, DHS Symposium, Washington DC, August 2013
329. Invited, L. Hesselink, "Novel Photo-Electron Source for Application in Data Storage , 3-D X-Ray and Medical Imaging, IPC ODS meeting, September 2013
330. Invited, L. Hesselink, "DPC Imaging for Aviation Security Applications", September 2013
331. Invited, L. Hesselink, "Photo Electron X-Ray Source Array", SPRC, September 2013
332. Invited, L. Hesselink, "DPC for Aviation Security Applications", ADSA09, October 2013
333. Invited, L. Hesselink, "Recent Advances in DPC 3-D X-Ray Imaging", Imaging Symposium, October 2013
334. Invited, Carlo Scalo, Jeffrey Lin, Sanjiva K. Lele and Lambertus Hesselink, A numerical study of thermoacoustic Stirling heat engines, The Thermal & Fluid Sciences Affiliates and Sponsors Conference at Stanford University (Feb. 2013)
335. Invited, Jeffrey Lin, Carlo Scalo, Sanjiva K. Lele and Lambertus Hesselink, Thermoacoustic Stirling heat engines and refrigerators, Stanford Energy Showcase at Stanford University (April 2013)
336. L. Hesselink, "DPC X-ray measurements of liquids", Duke University, November 2013
337. L. Hesselink, "3-D Differential Phase Contrast X-Ray Imaging: recent results", Collaborative Conference on 3D and Materials Research (CC3DMR) 2015, Busan, South Korea, June 2015
338. L. Hesselink, M. Yuen, C-W. Chang, Y-T. Cheng, G. Herring, L. Galambos, S. Orlov, J. Wilde, W. Aitkenhead, Y-S. Kim, J. Kim, S. Wang, C. Summitt, Y. Takashima, "Novel 3D Differential Phase Contrast Imaging System", Collaborative Conference on 3D and Materials Research (CC3DMR) 2016, Seoul, South Korea, June 2016

CONTRIBUTED TALKS: (93-05) 1981-1992 AVAILABLE ON REQUEST. PARTIAL LIST

1. Hesselink, L., "Volumetric Hologram Storage," AFOSR/NC, Organic/Polymeric Photorefractive Materials Workshop, Thousand Oaks, CA July 22, 1994.
2. Hesselink, L., "Holographic Information Storage," tutorial CLEO/IQEC '94, Anaheim, CA May 8-12, 1994.
3. Hesselink, L., "Materials for Holographic Storage," Material Science Seminar, Stanford University, March 4, 1994.
4. Hesselink, L.; Bashaw, M. C., "Optical memories implemented with photorefractive media," Optical and Quantum Electronics 25(9), special issue on Optical Memories and Neural Networks, S611, 1993.
5. Hesselink, L.; "Holographic Data Storage Systems and Materials," OSA Topical Meet, Photorefractive Materials, Effects & Devices, Estes Park, CO, June 1995.
6. IEEE/LEOS, Lasers and Electro-Optics Society, invited chairperson "Optical Data Storage Systems," San Francisco, CA November 1995.
7. OSA Topical Meeting, Program Committee Session Chair: Holography, Boston, MA, April 1996.
8. Presentation at Visualization '97 Conference, Phoenix, AZ, October 20-24, 1997, "Singularities in Non-uniform Tensor Fields," by Yingmei Lavin and Lambertus Hesselink.

9. Liu, Alice; Lee, Myeongku; and Hesselink, Lambertus , “Light Induced Properties and Thermal Fixing in Photorefractive Lead Barium Niobate Crystals,” PR ’99 7th Topical Meet on Photorefractive Materials, Effects and Devices, June 27-30, 1999, Elsinore, Denmark
10. Orlov, Sergei S.; Liu, Alice; Lambertus Hesselink; and Neurgaonkar, R. R., “Two-photon holographic recording and stoichiometric lithium niobate,” PR ’99 7th Topical Meet on Photorefractive Materials, Effects and Devices, June 27-30, 1999, Elsinore, Denmark
11. ISOM/ODS ’99 Conference, “Physical Properties of volume holographic recording utilizing photoinitiated polymerization for nonvolatile digital data storage,” Paraschis, Loukas; Sugiyama, Yasuyuki; and Hesselink, Lambertus, July 11-15, 1999, Koloa, Hawaii.
12. SPIE Annual Meeting, “Physical Properties of Photopolymer Recording for Nonvolatile Volume Holographic Storage,” Paraschis, Loukas; Sugiyama, Yasuyuki; and Hesselink, Lambertus,” July 18-20, 1999, Denver, CO.
13. American Conference on Crystal Growth and Epitaxy, “Crystal Growth of Stoichiometric LiNbO₃ using LiV0₃ as Flux,” Galambos, Ludwig; Akella, Annapoorna; Hesselink, Lambertus, “August 1-6, 1999, Tucson, AZ.
14. ICO ’99 SPIE International Society for Optical Engineering Conference, “Physical Properties of Photopolymer Recording for Nonvolatile Volume Holographic Storage,” Paraschis, Loukas; Sugiyama, Yasuyuki; and Hesselink, Lambertus, August 2-6, 1999, San Francisco, CA.
15. IEEE Visualization ’99, “Feature Comparisons of 3-D Vector Fields using Earth Movers Distance,” R. Batra & L. Hesselink, San Francisco, CA, October 29, 1999.
16. IEEE Visualization ’99, “Topology-Based Vector Field Comparisons Using Graph Methods,” R. Batra, Kerstin Kling, and L. Hesselink, San Francisco, CA October 24-29, 1999.
17. Photonics West 2000, IS&T/SPIE’s 12th Annual Symposium on Electronic Imaging, “Topology-Based Methods for quantitative Comparisons of Vector Fields,” by Rajesh Batra, Kerstin Kling, and Lambertus Hesselink, San Jose, CA, January 23-28, 2000.
18. CLEO 2000 Conference, “Holographic digital storage with sensitive and flexible photo-initiated polymerization recording,” by L. Paraschis, Y. Sugiyama, S. Orlov and L., Hesselink, Stanford University, San Francisco, California, May 7-12, 2000.
19. ODS 2001 Conference, Xiaolei Shi, Robert Thornton, Lambertus Hesselink, “Nano-aperture with Ultra-high Power Throughput for VSAL”, Optical Data Storage Topical Meeting (ODS), Santa Fe, New Mexico, 4/22-4/25, 2001.
20. OSA 2001, "Nano-aperture with Ultra-high Power Throughput or Near Field Optical Applications", Xiaolei Shi, Robert L. Thornton, Lambertus Hesselink, October 14-18, 2001, Long Beach, CA,
21. QELS 2002 conference, Xiaolei Shi, Robert Thornton, Lambertus Hesselink, “Greatly Enhanced Power Throughput from a “C”-shaped Metallic Nano-Aperture for Near Field Optical Applications”, Quantum Electronics and Laser Science Conference, Long beach, CA., May 19-23, 2002.
22. NF07 International Conference, Xiaolei Shi, Robert Thornton, Lambertus Hesselink, “Greatly Enhanced Light Transmission through a “C”-shaped Metallic Nano-aperture for Near Field Optical Applications”, The 7th International Conference on Near-Field Optics and Related Techniques (NFO7), Rochester, NY, August 11-15, 2002.
23. OSA Annual Meeting, Xiaolei Shi, Lambertus Hesselink, “Metallic Nano-aperture’s Geometric Effect on Light transmission”, Annual meeting of the Optical Society of America, Orlando, Florida, September 29 to October 3, 2002.

24. OSA Annual Meeting, Joseph Matteo, Xiaolei Shi, Yin Yuen, Lambertus Hesselink, "Optical nano-tweezer using enhanced transmission sub-wavelength aperture", Annual meeting of the Optical Society of America, Orlando, Florida, September 29 to October 3, 2002.
25. OSA Annual Meeting, Jun Ren, Lambertus Hesselink, "Laser silicon micromachining," Annual Meeting of the Optical Society of America, Orlando, Florida, September 29 to October 3, 2002.
26. ICOLA'02 Conference, Lambertus Hesselink, Xiaolei Shi, "Ultra-high Power Transmission Through a Single Nano-Aperture", International Conference on Opto-electronics and Laser Applications (ICOLA), Jakarta, Indonesia, October 2-3, 2002 (Invited).
27. CLEO-Europe EQEC 03 Conference, "Digital Volume Holography and Optical Disk Storage System," M. Inoue and L. Hesselink, Munich, Germany, J. W. Son, Y. Yuen, S. Orlov, W. Phillips, L. Galambos, V. Shur, and L. Hesselink, June 2003
28. OSA Topical Meeting: Bragg Gratings Photosensitivity and Poling in Glass Waveguides, Ji-Won Son, Yin Yuen, Sergei S. Orlov, Bill Phillips, Ludwig Galambos, Lambertus Hesselink, Stanford University and Vladimir Y. Shur, Ural State University, "Domain engineering in LiNbO₃ thin films grown by liquid phase epitaxy," Monterey, California, September 1-3, 2003.
29. Stanford Photonics Research Center Annual Meeting, J. W. Son, Y. Yuen, S. Orlov, W. Phillips, L. Galambos, V. Shur, and L. Hesselink, "Direct-write e-beam domain engineering in LiNbO₃ thin films grown by liquid phase epitaxy, September 2003.
30. Stanford Photonics Research Center Annual Meeting, J. W. Son, W. Phillips, L. Galambos, S. Orlov, and L. Hesselink, "Growth and Characterization of Lithium Niobate Waveguide by Liquid Phase Epitaxy," September 2003.
31. Bragg Gratings Photosensitivity and Poling in Glass Waveguides, OSA Topical Meeting, J. W. Son, Y. Yuen, S. Orlov, W. Phillips, L. Galambos, V. Shur, and L. Hesselink, "Domain engineering in LiNbO₃ thin films grown by liquid phase epitaxy", Monterey, CA, September 2003.
32. OSA Annual Meeting, Laser Science XIX, Jun Ren and L. Hesselink, "Laser silicon micromachining", Orlando, FL, Sept-October 2003.
33. OSA Annual Meeting, Laser Science XIX, J. W. Son, Y. Yuen, S. Orlov, W. Phillips, L. Galambos, V. Shur, and L. Hesselink, "Domain engineering in LiNbO₃ thin films grown by liquid phase epitaxy", Tucson, AZ, October 2003.
34. Materials Research Society Fall Meeting J. W. Son, Y. Yuen, S. Orlov, W. Phillips, L. Galambos, V. Shur, and L. Hesselink, "Submicron Ferroelectric Domain engineering in LiNbO₃ thin films grown by liquid phase epitaxy", Boston, MA, December 2003
35. Materials Research Society Fall Meeting, Ferroelectric Thin Films, XII, J. W. Son, Y. Yuen, S. Orlov, W. Phillips, L. Galambos, V. Shur, and L. Hesselink, "Parametric studies on Suppressing Secondary Phases in Lithium Niobate Thin Films deposited by Pulsed Laser Deposition", Boston, MA, December 2003.
36. Son, Ji-Won, Orlov, Sergei, Phillips, Bill and Hesselink, Lambertus, "Parametric studies on Suppressing Secondary Phases in Lithium Niobate thin films deposited by Pulsed Laser Deposition, MRS Fall Meeting, Boston, MA, December 2003.

48. Laser ablation of silicon in water with nanosecond and femtosecond pulses, Ren, J; Kelly, M; Hesselink, L, Optics Letters; Jul 1 2005; v.30, no.13, p.1740-1742
49. Electromagnetic phenomena in advanced photomasks, Schellenberg, FM; Adam, K; Matteo, J; Hesselink, L Journal of Vacuum Science and Technology B: Microelectronics and Nanometer Structures; November/December 2005; v.23, no.6, p.3106-3115
50. Fractal extensions of near-field aperture shapes for enhanced transmission and resolution, Matteo, JA; Hesselink, L, Optics Express; January 2005; v.13, no.2, p.636-647
51. Characterization of a preliminary narrow-band absorption material for holographic data storage Dubois, Marc; Shi, Xiaolei; Lawrence, Brian; Boden, Eugene; Chan, Kwok Pong; Nielsen, Matthew; Hesselink, Lambertus, Proceedings of SPIE - The International Society for Optical Engineering; 2004; v.5380, p.589-596, Conference: Optical Data Storage 2004; Apr 18-21 2004; Monterey, CA, United States
52. Topology visualization of the optical power flow through a novel C-shaped nano-aperture, Sun, Liying; Batra, Rajesh K.; Shi, Xiaolei; Hesselink, Lambertus, IEEE Visualization 2004 - Proceedings, VIS 2004; 2004; p.337-344, Conference: IEEE Visualization 2004 - Proceedings, VIS 2004; Oct 10-15 2004; Austin, TX, United States
53. Ultra-high density optical data storage., Hesselink, L.; Leen, B.; Matteo, J.; Liying Sun; Yin Yuen, 2004 IEEE LEOS Annual Meeting Conference Proceedings, 7-11 Nov. 2004, Rio Grande, Puerto Rico; p.796-7 Vol.2,

- Conference: 2004 IEEE LEOS Annual Meeting Conference Proceedings, 7-11 Nov. 2004, Rio Grande, Puerto Rico.
54. Low-loss subwavelength metal C-aperture waveguide, Sun, Liying; Hesselink, L.; Optics Letters, 15 Dec 2006, vol 31, no. 24, p 3606-8.
 55. Media tilt tolerance of bit-based and page-based holographic storage systems, Takashima, Y.; Hesselink, L.; 2006 Optical Data Storage Topical Meeting, 23-26 April 2006, Montreal, Quebec, Canada, p 221-3.
 56. C-shaped nanoaperture-enhanced germanium photodetector, Liang Tang; Miller, DAB; Okyay, AK; Matteo, J.A.; Yin Yuen, Saraswat, KC; Hesselink, L., Optics Letters; 15 May 2006, vol. 31, no. 10, p. 1519-21.
 57. Temporal and spectral nonspecularities in reflection at surface plasmon resonance, Xiaobo Yin; Hesselink, L.; Chin, H.; Miller DAB, Applied Physics Letters, 24 July 2006; vol. 89, no. 4, p. 41102-1-3.
 58. A C-shaped nanoaperture Vertical-Cavity Surface-Emitting Laser for high-density near-field optical data storage, Rao, Zhilong; Matteo, Joseph A.; Hesselink, Lambertus; Harris, James S.
The International Society for Optical Engineering; 2006; v.6132
Conference: Vertical-Cavity Surface-Emitting Lasers X; San Jose, CA, United States
 59. Media tilt tolerance of bit-based and page-based holographic storage systems, Takashima, Yuzuru; Hesselink, Lambertus, Proceedings of SPIE - The International Society for Optical Engineering; 2006; v.6335, Conference: Organic Holographic Materials and Applications IV; 2006; San Diego, CA, United States
 60. Media tilt tolerance of bit-based and page-based holographic storage systems, Takashima, Yuzuru; Hesselink, Lambertus, 2006 Optical Data Storage Topical Meeting - Post Deadline Papers; 2006; p.221-223
Conference: 2006 Optical Data Storage Topical Meeting; 2006; Montreal, QB, Canada
 61. Highly sensitive surface plasmon resonance chemical sensor based on Goos-Hanchen effects, Yin, Xiaobo; Hesselink, Lambertus, Proceedings of SPIE - The International Society for Optical Engineering; 2006; v.6324, Conference: Plasmonics: Nanoimaging, Nanofabrication, and their Applications II; 2006; San Diego, CA, United States
 62. En-squared power based optical design for page-based holographic storage systems, Takashima, Yuzuru; Hesselink, Lambertus, Proceedings of SPIE - The International Society for Optical Engineering; 2006; v.6342 I, Conference: International Optical Design Conference 2006; 2006; Vancouver, BC, Canada
 63. Media tilt tolerance of bit-based and page-based holographic storage systems, Takashima, Yuzuru; Hesselink, Lambertus, Proceedings of SPIE - The International Society for Optical Engineering; 2006; v.6282, Conference: Optical Data Storage 2006; 2006; Montreal, Canada
 64. Lens designs for page-based holographic storage systems, Takashima, Yuzuru; Orlov, Sergei; Hesselink, Lambertus, Department of Electrical Engineering Stanford University 420 Via Palou Mall ; Stanford, CA 94305 ; United States, Proceedings of SPIE - The International Society for Optical Engineering; 2007; v.6620, Conference: * Optical Data Storage 2007; Portland, OR, United
 65. Highly sensitive surface plasmon resonance chemical sensor based Goos-Hänchen effects, X. B. Yin, L. Hesselink, Proceedings of SPIE 6324, (2006).
 66. 90 degree bent metallic waveguide with a tapered C-shaped aperture for use in HAMR, Leen, J. Brian; Cho, Eunhyoung; Sun, Sung-Dong; Hansen, Paul C.; Sohn, , Jin-Seung; Choa, Sung-Hoon; Hesselink, Lambertus, Dept. of Applied Physics Stanford University ; Stanford, CA 94305, Proceedings of SPIE - The International Society for Optical Engineering; 2007; v.6620, Conference: Optical Data Storage 2007; Portland, OR, United States
 67. High-intensity bowtie nano-aperture Vertical-Cavity Surface-Emitting Laser for ultrahigh-density near-field optical data storage, Rao, Zhilong; Hesselink, Lambertus; Harris, James S., Solid State and Photonics

Laboratory Stanford University ; Stanford, CA 94305, Proceedings of SPIE - The International Society for Optical Engineering; 2007; v.6620, Optical Data Storage 2007; Portland, OR, United States

68. Media tilt tolerance of bit-based and page-based holographic storage Systems, Takashima, Yuzuru; Hesselink, Lambertus, Department of Electrical Engineering Stanford University 420 Via Palou Mall ; Stanford, CA 94305 ; United States, Proceedings of SPIE - The International Society for Optical Engineering; 2006; v.6335, Conference: Organic Holographic Materials and Applications IV; 2006; San Diego, CA, United States
69. "90° Bent Metallic Waveguide with a Tapered C-shaped Aperture for Use in HAMR", John B. Leen, Eunhyoung Cho, Sung-Dong Suh, Paul C.
